BUSINESS SYSTEMS LABELS

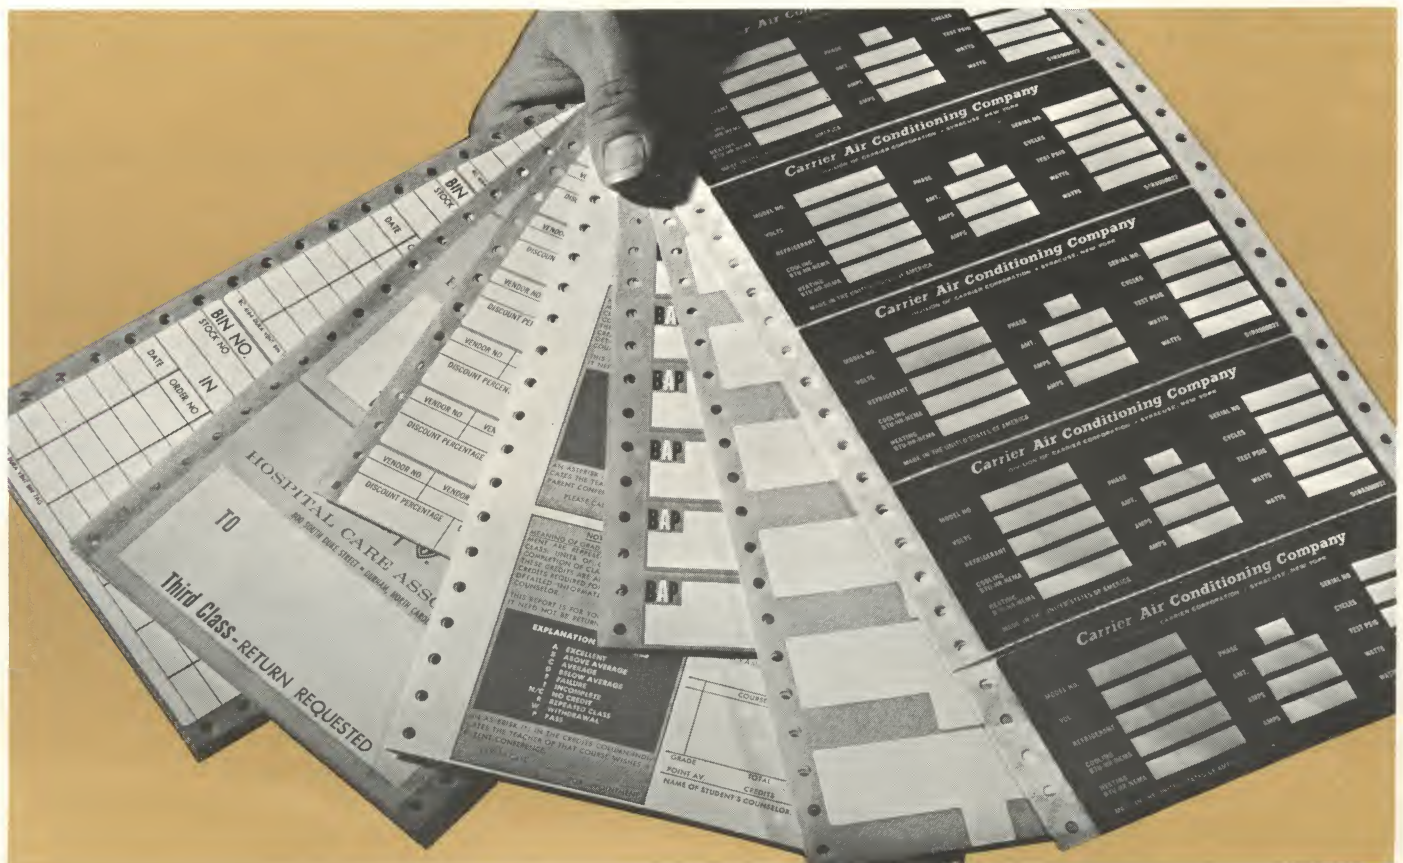

Your EDP printer will provide important new savings
in time, money and manpower when you use the...

AVERY® Tabulabel® SYSTEM

Customized, self-adhesive labels that transfer
data from tape or punched cards to
Address/File/Post/Price/Code/Mark/Identify

Avery's stick-at-a-touch continuous form labels can be imprinted at high speeds on any EDP printer which handles pin-feed forms. White and smudge-proof, these "business forms" are precision die-cut on backing paper for exact printer registration.

Removal and application is quick and easy...by hand or automatically...for efficient use on mailing pieces, ledgers, payroll records, documents, inventory cards, cost control forms, stock bins...even on manufactured products in the form of solid aluminum nameplates.

A **Tabulabel**® SYSTEM
INCREASES THE USEFULNESS
OF YOUR EDP EQUIPMENT

It provides cost-cutting, made-to-order answers to every EDP label problem. Your labels are customized to meet individual form and program requirements... allowing data to be placed on existing records without printing out an entire new form or running existing forms through an imprinter.

Now you can replace time-consuming manual or direct-to-record methods... eliminate human error in posting and needless duplication... and cut the cost of re-copying or replacing existing records.

As a system, the Avery Tabulabel® is the most efficient way to transfer imprinted information... to records... to documents... neatly, quickly and at low cost.

AVERY WILL CUSTOM DESIGN A

Tabulabel®

TO SUIT YOUR SPECIFIC NEEDS.

Your options include: nearly any size or shape, with several hundred die shapes available... choice of several paper stocks, fabric or aluminum foil... adhesive that is *permanent*, or *removable* without residue... multiple widths to save machine time... split, perforated or punched forms... special adhesive patterns... in rolls or continuous form... and all colors or combinations of colors for identification and coding.

FINANCE COMPANY

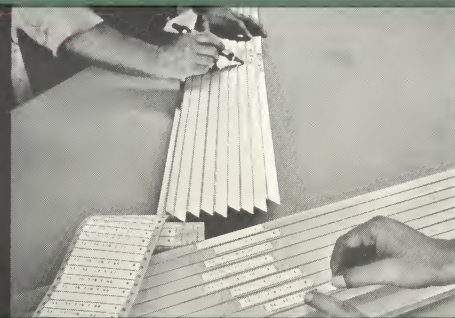

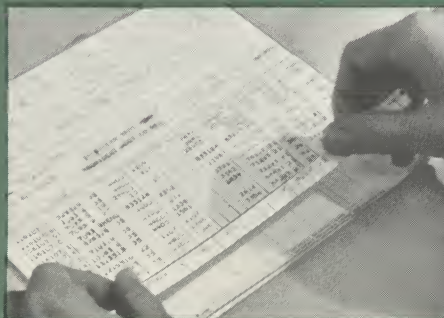

Bookkeeping for 400 branches was consolidated in one location. Daily, each branch sends records of all its transactions to the computing center. Account number, date, distribution of payment toward principal and interest, and the new balance... all are printed on a Tabulabel that matches the account ledger sheets. The labels then are returned to the branches daily for placement on these sheets.

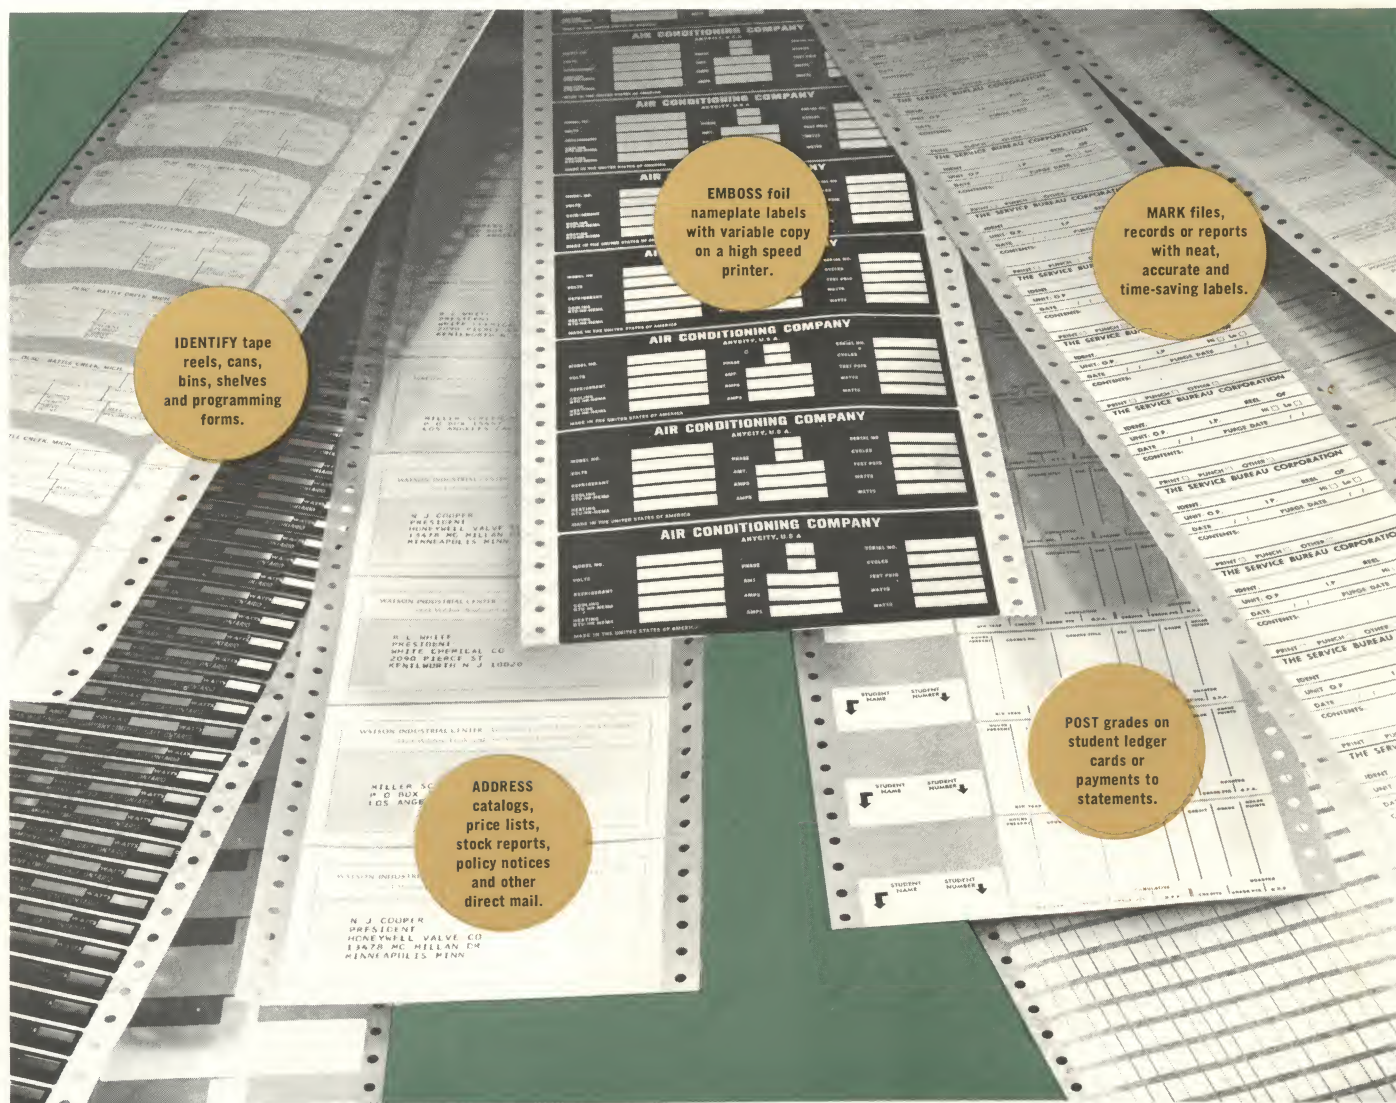

SCHOOL DISTRICT

Semester grades are converted into punch cards, fed into the EDP system, and print-out made on duplicate labels. One goes on the permanent record card in the registrar's office, and the other is for the counseling office records. The school also uses Tabulabels for its mailings. They are printed out from parent name and address information already on punch cards.

ALUMINUM PARTS MANUFACTURER

Manual identification with marking pens was replaced with self-adhesive labels showing job lot, date, factory job number, etc. The labels also carry production set-up numbers, providing quick reference to more detailed production work orders. Tabulabels eliminate illegible markings and provide more extensive information than was available with the old system. After parts installation, the labels remove without residue.

SAVINGS AND LOAN CORPORATION

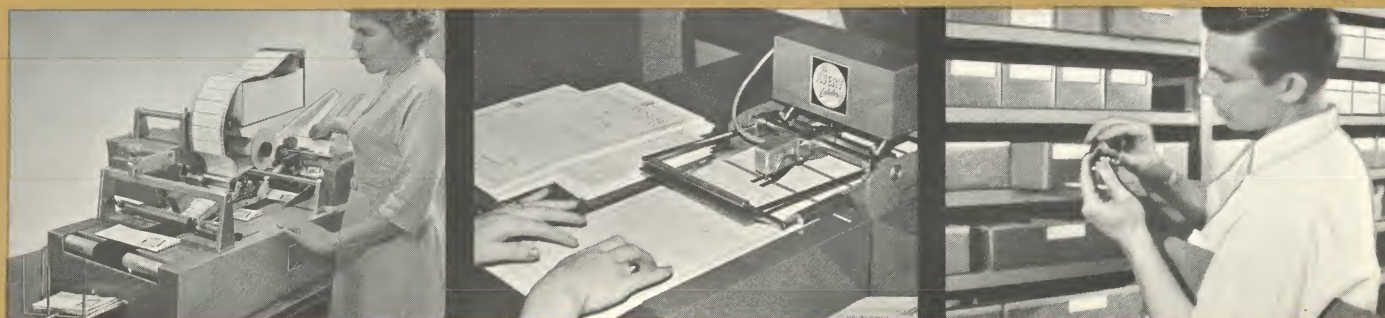

Constant communication with 40,000 depositors is maintained quickly and easily by using a Tabulabel system. Triplicate labels are printed on their IBM 1401 with names and addresses which already were stored in magnetic tapes...ending the need for separate address plates. An automatic Tabulabeler affixes the labels to envelopes and mailers up to 6,000 an hour.

LIFE INSURANCE COMPANY

The number of insurance policy forms was reduced from hundreds to just a few stock forms by using a Tabulabel system. Instead of writing a complete policy for each new policy holder, they simply program their IBM 1401 to print the variable information onto labels. The number of forms has been reduced and there is no longer need to type each new policy individually.

MAJOR AIR LINE

This company's maintenance center inventories thousands of parts for its mainliner fleet and a Tabulabel system helps get the job done efficiently. Using inventory information already in storage, the parts control data is retrieved for print-out on Tabulabels. A color-coded label with the name of the part, the part number, the minimum inventory, and the re-order point is affixed to every parts bin.

AVERY DISPENSERS AND LABELERS

make TABULABEL application
easy, fast and efficient

TAB-O-MATIC ADDRESSING MACHINE

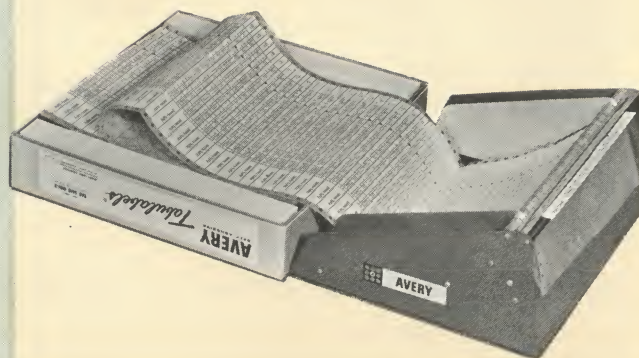

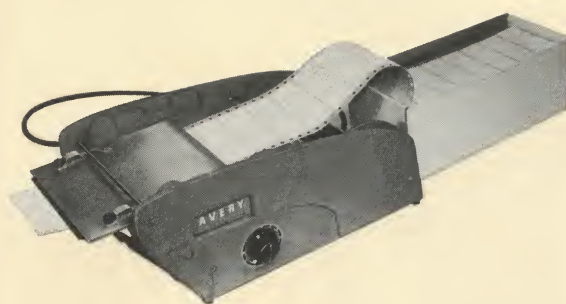

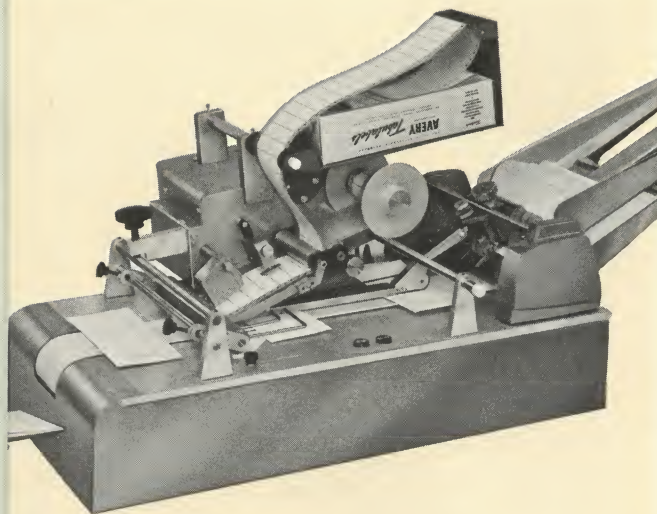

The fully automatic Avery Tab-O-Matic addressing machine will apply self-adhesive, pin-feed labels to envelopes up to 6,600 an hour. It will accurately place labels up to 4" wide on envelopes and self-mailers up to 9" x 12". Envelope or label size changes require only simple adjustments. Compact and quiet, it requires only 23" x 57" space as a table model, or a floor standing unit.

E7-6 ELECTRIC DISPENSER

The 17½" x 9¾" Dispenser works efficiently with continuous form labels. An experienced operator can apply self-adhesive, pin-feed labels to envelopes at speeds up to 1,500 per hour. A foot switch makes possible either continuous or intermittent label dispensing... and dispensing speed is controlled by a rheostat. Dispenser handles labels up to 6" wide. Multiple width labels burst at the perfs to meet this requirement. Dispenser does not utilize pin-feed holes to feed the labels.

H5-12 MANUAL DISPENSER

This lightweight, table model effortlessly dispenses continuous form labels. It is convenient, simple to use and provides an inexpensive way to increase the efficiency of completely manual labeling. Accommodates labels up to 12" wide. Dispenser dimensions: 5¼" high x 12" wide x 10½" long.

READY TO LEARN MORE about cutting

costs and extending the use of your
EDP system with Avery Labels?

Start today by taking at least one of these steps

Phone your nearest Avery Label Office and ask an experienced Tabulabel expert to see you with on-the-spot pricing information.

Ask to see "TABULABELS FOR BUSINESS SYSTEMS", a 14 minute color-sound motion picture that shows how eight important and diversified companies solved problems and cut costs with Avery labels.

Send for your BUSINESS SYSTEMS LABEL KIT, including label samples and case histories pertinent to your business.
